Claims 1-5, 7-23 is pending.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 7, drawn to beta-bactam derivatives, classified in class 540, subclass 360.
- II. Claims 8-23, drawn to taxane derivatives and method of making the same, classified in class 549, subclass 510.

The above delineated groups are distinct and separate because of their recognized divergent subject matter and different classifications based on their different chemical structures and the manufacturing's. A search of one group is not required for the search of other group and vice versa. A reference of one group would not suggest and/or render the other group obvious in the absence of secondary teachings. Thus, the restriction requirement as indicated above is deemed proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
